# User Stories And Epics

## Epic 1: Homepage Management

1. **User story 1.1:**
   As a user, I want to view a list of products on the homepage, displayed in a three-column layout, so that I can browse available items.
2. **User story 1.2:**
   As a user, I want to sort products by alphabetical order or price (high to low) or price (low to high) or Newest, or Oldest, Best rating or Most viewed, so that I can quickly find the items I need.
3. **User story 1.3:**
   As a user, I want to filter products by price ranges, so that I can easily refine my search.
4. **User story 1.4:**
   As a user, I want to contral the number of products displayed per page to 10. 25, or 50), so that I can customize my browsing experience.
5. **User story 1.5:**
   As a user, I want to add products to my cart directly from the homepage, so that I can save items for purchase.

## Epic 2: Product details

6. **User story 2.1:**
   As a user, I want to view detailed product information on a separate product page so that I can make an informed purchase decision.
7. **User story 2.2:**
   As a user, want to leave feedback about a product using a feedback form, so that i can share my opinions or issues with the seller,
8. **User story 2.3:**
   As a user I want to add products to my cart directly from the product description page, so that I can save items for purchase

## Epic 3: Cart Management

9. **User story 3.1:**
   As a user. I want to view the total price of items in my cart, so that I can understand the cost before checkout
10. **User story 3.2:**
    As a user want to increase or decrease product quantities in my cart, so that can adjust my order before checkout

**11. User story 3.3:**

As a user, I want to remove items from my cart, so that I can refine my purchase list.

**12. User story 3.4:**

As a user, I want to proceed to checkout after reviewing my cart, so can complete my purchase.

**13. User story 3.5**

As a user, I want to apply coupons or gift cards to my purchase, so that I can avail discounts.

## Epic 4: User Account Management

**14. User story 4.1:**

As a user. I want to create an account with email verification, so that I can securely use the platform.

**15. User story 4.2:**

As a user, I want to log in to my account, so that I can use the application for my intended use.

**16. User story 4.3:**

As a user. I want to manage my shipping and billing addresses, so that I can reuse them for future purchases.

# Test Plan for Shopping Application

## 1. Test Plan Identifier

- **Title**: Test Plan for Academybugs Shopping Application
- **Version:** 1.0
- **Prepared By**: SIddhi Bhosale
- **Date:** 21/01/26

## 2. Introduction

- **Objective:** The objective of this test plan is to ensure the functionality, reliability, and usability of the Academybugs shopping application. The plan focuses on verifying sach feature as described in the user stories, identifying bugs, and validating fixes
- **Scope:** This test plan covers
  1. Homepage features (product display, sorting, filtering pagination).
  2. Product description page functionalities
  3. Cart management, checkout, and payment options.
  4. User account features (signup, login, dashboard, address management).
- **Exclusions:**
  Non-functional testing like performance, load and security testing.

## 3. Test Items

The features to be tested indude:

**1. Homepage**

- Product display (3-column layout
- Sorting and filtering options.
- Pagination (10, 25, 50 products per page),

**2. Product Details Page**

- Product description fields (model number, manufacturer), Social media buttons.
- Feedback form functionality

**3. Cart Management:**

- Add, remove increase decrease product quantities
- Calculate cart total (dynamic updates

**4. Checkout and Payment:**

- Billing and shipping address forms.
- Apply coupon/gift card functionality
- Proceed to checkout

**5. User Account Management**

- Signup and login process.
- Dashboard with past orders.
- Address management.

# 4. Test Approach

## Testing Levels:

1. Unit Testing: Verify individual components (eg, add-to-cart functionality).
2. Integration Testing. Ensure components work together (eg, cart updates on removing items).
3. System Testing: Validate the entire application end-to-end
4. Regression Testing: Recheck fixed bugs and other functionalities after updates

## Testing Types:

1. Functional Testing: Verify each feature works as expected.
2. Usability Testing: Ensure the application is user-friendly.
3. Exploratory Testing: Identify potential bugs not covered in test cases.

## Test Techniques:

1. Boundary value analysis (e.g., pagination limits).
2. Equivalence partitioning (e.g., valid vs. invalid login credentials).
3. Manual exploratory testing

# 5. Test Environment

**Hardware:**

1. Minimum requirements: Dual-core processor, 4GB RAM, stable internet connection
2. Devices: Desktop (Windows, macOS) Mobile (GOS, Android)

**Software:**

1. Browser, Chrome, Firefox, Safari, Edge.
2. Tools: Zephyr Scale (test case management). JIRA (bug tracking).
3. Staging Environment
4. URL: (Application Staging URL)

## 6. Test Deliverables

**Documents:**

1. Test Plan Document
2. Test Cases (with detailed steps and expected results)
3. Bug Reports (logged in JIRA).
4. Test Summary Report

**Execution Results**

1. Pass/Fail status of each test cate
2. Screenshots for failed test cases
